

Handicap Adjustment Rule 24.

The handicap committee have decided to start an annual end of season handicap review of all players, in the hope of in time making the handicaps more even, players with an average of more than 60% and less than 40% will have their handicap adjusted accordingly, some players may be unhappy with their new handicap this year but if they look at their averages from last year they may understand, this is the starting point, we hope this will improve a very successful competition. Please be patient and give this a fair try. I hope you all have a very enjoyable season.
